DesignBun

CAPABILITIES

Software engineering capabilities.

DesignBun is the brand of Design Bun Limited, a Colorado LLC formed June 23, 2017. Custom applications, integrations and AI workflows, led by Max Limsukhawat in Denver with remote delivery.

Lead engineer: Max Limsukhawat **Contact:** max@designbun.com

Core services

Applications & portals

Custom web applications, administrative dashboards, customer portals and internal operational tools.

APIs & integrations

Backend services, third-party integrations, onboarding workflows and workflow automation.

AI workflows & evaluation

Agent integrations, retrieval workflows, LLM evaluation tooling and model-release checks.

Maintenance & handoff

Application improvements, issue resolution, testing, deployment documentation and ongoing engineering support.

Relevant engineering experience

Max has built production software since 2015 and co-founded products, including leading a six-person development team.

- **B3IQ, B3 Labs:** buyer onboarding with Veriff and DocuSign, administrative and fulfillment tools, a Cloudflare Worker control plane, Go host-agent work and Python model-release tooling.
- **B3OS, B3 Labs:** workflow services, AI agent features, OpenRouter integrations and an LLM evaluation framework with release gates.
- **Game7:** open-source EVM contracts, deployment workflows, tests and audit documentation.

These examples describe Max's contributions within the named product teams. Company references and engagement scope are reviewed against the relevant agreements.

Delivery approach

Agree on scope, acceptance criteria, dependencies and access. Implement with tests and regular review. Document the deployment and handoff.

Technical strengths

TypeScript, React, Next.js, Node.js, Go, Python, Cloudflare Workers, PostgreSQL and third-party service integrations.
